LETTER OF INTENT

To Whom It May Concern,

I hereby express my formal interest in the Regional Quality Manager – Oil & Gas Infrastructure opportunity.

Having built a career spanning more than two decades within quality assurance, quality control, compliance, auditing, supplier quality management, and EPC project quality leadership, I am seeking to contribute my expertise to an organization committed to operational excellence and infrastructure delivery within the energy sector.

My professional experience includes leadership roles supporting major projects for EDF, BP, INEOS, Chevron, Total, Transocean, Lloyd's Register, Wood Group, and other globally recognized organizations. Throughout these assignments, I have successfully managed quality systems, contractor compliance programs, supplier surveillance activities, inspection frameworks, audits, regulatory requirements, and multidisciplinary quality teams.

I am particularly interested in this opportunity because it aligns directly with my experience overseeing quality governance across complex oil & gas, petrochemical, refinery, power generation, and industrial infrastructure projects. I believe my ability to implement robust quality management systems, improve compliance performance, and drive continuous improvement initiatives can provide significant value to the organization.

I look forward to the opportunity to further discuss my qualifications and demonstrate how my experience can support the successful delivery of your quality and operational objectives.

Respectfully,
TONY ANDERSON
