PROFESSIONAL SUMMARY

Strategic Quality Management professional with 20+ years of international experience leading quality assurance, quality control, compliance, inspection, auditing, supplier quality, and construction quality programs across oil & gas, energy, petrochemical, power generation, infrastructure, offshore, manufacturing, and EPC environments. Demonstrated success managing multidisciplinary quality teams, implementing Quality Management Systems (QMS), driving contractor and supplier compliance, developing inspection and testing frameworks, managing audits, reducing quality risks, and ensuring successful project execution for major global organizations including EDF, BP, INEOS, Chevron, Total, Wood, Bonatti, Vinci Energies, Framatome, Lloyd's Register, Transocean, and Vattenfall.

Recognized for delivering quality governance, regulatory compliance, operational excellence, stakeholder engagement, and continuous improvement initiatives across large-scale industrial construction and energy infrastructure projects.

CORE COMPETENCIES

- Regional Quality Management
- Quality Assurance & Control (QA/QC)
- Quality Management Systems (QMS)
- ISO 9001 Compliance
- EPC Project Quality Management
- Construction Quality Oversight
- Quality Governance
- Regulatory Compliance
- Contractor Management
- Supplier Quality Management
- Quality Auditing
- NCR & CAPA Management
- Risk Assessment & Mitigation
- Continuous Improvement
- Inspection & Test Plans (ITPs)
- Mechanical Completion
- Turnover Documentation
- KPI Reporting • Stakeholder Management
- Team Leadership
- Welding Inspection
- NDT Programs
- Power Generation
- Oil & Gas Infrastructure

PROFESSIONAL EXPERIENCE

- 11/2025 - Current **QA/QC Manager, EDF Power Generation Project (Bonatti Spa), France**
- Lead project quality management activities for a major EDF power generation

infrastructure project.

- Manage a team of 10 quality inspectors covering civil, structural, mechanical, piping, HVAC, coating, and E&I disciplines.
- Develop and implement project-specific Inspection & Test Plans (ITPs), quality procedures, and compliance frameworks.
- Direct NCR management, corrective actions, contractor compliance, and quality performance monitoring.
- Coordinate quality interfaces with EDF, APAVE, subcontractors, and project stakeholders.
- Develop and monitor project KPIs related to quality performance, inspections, audits, and turnover activities.
- Manage final construction record books and project closeout documentation.

09/2014 - 03/2026

Owner & Principal Quality Consultant, INTEGRITY INSPECTIONS, EUR, France

- Provided independent QA/QC consulting, inspection, auditing, and quality management services across oil & gas, petrochemical, power generation, offshore, and industrial projects.
- Delivered supplier surveillance, welding inspection, construction quality oversight, compliance auditing, and documentation review services.
- Supported major projects for EDF, INEOS, BP, Chevron, Total, Wood, and other international organizations.
- Developed quality procedures, inspection programs, NCR management processes, and project-specific compliance frameworks.
- Performed client representation, vendor assessments, quality audits, and project quality assurance activities throughout Europe.

09/2024 - 07/2025

QA/QC Manager, INEOS Project One, Belgium

- Directed quality assurance and quality control activities for one of Europe's largest petrochemical infrastructure projects.
- Developed quality plans and inspection programs across civil, structural, mechanical, piping, HVAC, coatings, and E&I scopes.
- Managed client inspections, RFIs, NCR closure, and quality documentation processes.
- Coordinated multidisciplinary inspection teams and supported mechanical completion milestones.

01/2022 - 07/2024

QA/QC Supervisor, BP Petroleum Depot, France

- Ensured quality compliance during large-scale refurbishment of petroleum storage infrastructure.
- Managed contractor quality performance, NCR processes, concession requests, and final quality acceptance activities.
- Conducted welding, coating, civil, and structural inspections ensuring compliance with applicable standards and project requirements.
- Supported refurbishment of multiple large-capacity petroleum storage tanks, including shell, floor, floating roof, piping, and associated systems.
- Administered non-conformance management and contractor deviation processes throughout project execution.

12/2020 - 04/2022

***Assistant QC Manager, Senior Quality Consultant
Chevron Anchor & Ballymore Projects (Lloyd's Register)
Dec 2020 – Apr 2022***

- Performed manufacturing surveillance, welding audits, NDT audits, FAT witnessing, and

quality documentation reviews for subsea drilling equipment.

- Supported fabrication and testing of 20K FLS Gate Valves, Flowspools, Tees, Elbows, Crossovers, and associated subsea equipment.
- Identified quality concerns and coordinated corrective actions with manufacturing stakeholders.

Total Dongses Refinery Project (IREM France)

Sept 2021 – Dec 2021

- Developed and revised project-specific welding, NDT, and PWHT procedures.
- Managed welder qualification matrices and qualification records.
- Witnessed and validated welding qualification testing programs.

Aerobar Las Vegas Project

Feb 2021 – Jul 2021

- Conducted AWS CWI consultation and welding inspections.
- Reviewed welding procedures, welder qualifications, and fabrication quality systems.
- Performed fit-up, in-process, and final weld inspections.

EARLIER CAREER EXPERIENCE

QA/QC Manager | Vinci Energies (BP VGAP Project) | France Oct 2019 – Dec 2020

- Led quality management activities covering piping, instrumentation, electrical, civil, coating, and welding disciplines.
- Managed DESP certification requirements and regulatory compliance processes.
- Directed NCR management, turnover dossiers, client acceptance activities, and project quality documentation.

QA/QC Manager | Wood Group (Borealis Project) | France Mar 2018 – Jul 2018

- Implemented and maintained project quality management procedures.
- Approved quality plans, inspection plans, and contractor quality documentation.
- Coordinated audits, quality inspections, and turnover documentation activities.

QA/QC Coordinator & Inspector | Huisman Equipment | Netherlands Mar 2017 – Mar 2018

- Managed fabrication quality oversight for offshore crane construction projects.
- Coordinated client and classification society inspections.
- Supervised welding, NDT, coating, and structural steel quality activities.

Lead Inspector & Resident Surveyor | Transocean Deepwater Drilling | France Nov 2012 – Jan 2017

- Served as client representative for manufacturing, inspection, testing, FAT programs, and quality acceptance of offshore drilling equipment.
- Managed vendor surveillance, production monitoring, compliance verification, and data book reviews.
- Supported delivery of critical subsea and drilling equipment programs.

Inspector / Expeditor | Quinex SARL | France

Aug 2012 – Aug 2014

QC Supervisor | IESCO Oct 2011 – Jul 2012

Flint Hills Resources Refinery – Rosemount, Minnesota, USA (One of the largest petroleum refineries in the United States)

- Supervised piping fabrication, welding, testing, and installation activities within refinery operations.
- Oversaw contractor welder qualification testing, production welding, and piping installation activities.
- Witnessed hydrostatic, pneumatic, static, and service testing of refinery piping systems.

- Reviewed PMI and PWHT results and verified contractor compliance with refinery and code requirements.
- Conducted Corrosion Under Insulation (CUI) inspections and supported refinery piping replacement programs.

Quality Control Manager | New Mech Companies / CORVAL Group May 2008 – Oct 2011

Flint Hills Resources Refinery – Rosemount, Minnesota, USA (One of the largest petroleum refineries in the United States)

- Managed quality control activities for power piping, process piping, pressure vessel, and structural steel fabrication projects.
- Served as primary quality interface with client inspection representatives.
- Directed welder qualification programs, continuity tracking, and welding quality monitoring initiatives.
- Developed inspection and testing packages including hydrostatic, pneumatic, visual, and NDT testing requirements.
- Managed field inspection personnel and ensured compliance with ASME and AWS requirements.
- Oversaw welding inspections, fabrication quality activities, and project documentation systems.

AWS CWI Inspector & NDT Level II Technician | American Engineering and Testing Inc. | USA May 2004 – May 2008

CERTIFICATIONS

- AWS Certified Welding Inspector (CWI)
- API Certified Source Inspector – Fixed Equipment
- OSHA 10 Certified
- GIES 2 Industrial Site Safety Certification

KEY PROJECT EXPERIENCE

- EDF Power Generation Project
- INEOS Project One
- BP Petroleum Infrastructure Projects
- Chevron Anchor & Ballymore Projects
- Total Donges Refinery Project
- Hinkley Point C Nuclear Project
- Borealis Petrochemical Project
- Vattenfall Offshore Wind Farm
- Transocean Deepwater Drilling Programs
- BP VGAP Infrastructure Project
- Flint Hills Resources

TECHNICAL EXPERTISE

- Quality Management Systems (QMS)
- ISO 9001 Compliance & Auditing
- Inspection & Test Plans (ITPs)
- Quality Procedures & Governance

- Supplier Quality Management
- Contractor Performance Management
- Welding Inspection & Qualification Programs
- Non-Destructive Testing (NDT)
- Mechanical Completion & Turnover
- Pressure Equipment Compliance
- Piping & Structural Quality Control
- Civil Construction Quality
- Power Generation Quality Assurance
- Oil & Gas Infrastructure Quality
- Regulatory Compliance & Certification

ADDITIONAL QUALIFICATIONS

- Former ASNT NDT Level II Certification Holder (RT, UT, MT, PT, VT) – Extensive practical NDT inspection experience (2004–2012)

EDUCATION

Ridgewater College
Non-Destructive Testing Program
University of Minnesota
General Education for Engineering
Additional Professional Training:
AWS • API • ASNT • OSHA • GIES

LANGUAGES

English (Native)
French (Fluent)
